Cattle Country Video

Welcome,

Cattle Country Video is pleased to announce the offering for the High Plains Showcase video auction to be held Tuesday, July 2, 2024, at the University of Wyoming Marian H. Rochelle Gateway Center in Laramie, Wyoming.

We will be offering approximately 31,000 head of the finest cattle from the High Plains and Rocky Mountain regions. The sale will start at 9:00 am MST with 28,500 yearling feeder steers and heifers, followed by 2,200 calves, and 110 bred heifers. The High Plains Showcase will be broadcast live on the YouTube Channel @CattleCountry Video and online at www.cattleusa.com under the "Cattle Country Video" tab. The catalog and video for individual lots can be previewed at www.cattlecountryvideo.com by clicking on the "Catalog" tab. For more information or to register for a buyer's number, please call (575) 781-0196 and ask for Wayne. Questions on individual lots of cattle can be directed to the representative whose contact number is listed with the lot.

Our next video auction will be the Oregon Trail Classic on August 6th and 7th at the Weborg 21 Centre in Gering, Nebraska. The deadline for this auction will be Saturday, July 13th. We will follow this sale with the Frontier Fall Roundup at the Goshen County Rendezvous Center in Torrington, Wyoming. The catalog deadline for this auction will be Friday, August 23rd. Please contact your CCV representative to consign for these upcoming events.

Cattle Country Video is celebrating 15 years in business. Thank-you for your continued support and for trusting us to help you with your cattle marketing needs. We hope to see you on the Laramie Plains.

Sincerely,

Cattle Country Video Staff

In Memory of Cody Thompson

On June 6th we lost our dear friend and long-time colleague Cody Thompson. Cody has been a part of our many endeavors since the mid-1970's. His leadership, experience, and work ethic will be greatly missed by many.

It is estimated throughout his career Cody has represented over 300,000 video cattle. In addition to video cattle, he sent thousands more through Stockman's Livestock and Torrington Livestock Markets. His countless hours spent caring for his customers was an admirable example for the younger employees he mentored. Cody always had time to help the next generation learn and gain experience in all facets of agriculture.

Cody enjoyed a good horse, fancy cattle, and a hard-working crew. His family and friends will remember him as a fair and honest man. When we think of Cody, we will always have a smile on our face. He will be greatly missed.

Godspeed Cody.

A speed test can be done at www.speedtest.net and your connection speed should be at least 800 kbps or greater.

Terms and Conditions of Auction and Sale

AUCTION TERMS:

- Every effort has been made to assure the correctness of this catalog, but all announcements from the auction block shall take precedence over the printed material.
- Every buyer must be properly registered and have a buyer's number to bid and participate in auction. Participation in auction expressly means that the buyer agrees to adhere to these terms and conditions of auction.
- If any dispute arises between two or more bidders, the auctioneer may immediately put the lot up for sale again and resell to the highest bidder. The decision of the auctioneer shall be final and absolute.
- The auctioneer reserves the right to reject any and all bids and the record of sale kept by the auctioneer and clerk will be taken as final in the event of any dispute.
- This is a load lot sale. A load of cattle is 42,000# net weight or greater unless otherwise stated.

DELIVERY:

- All cattle will be weighed on a certified scale that is compliant with GIPSA (Grain Inspection and Packers & Stockyards Administration regulations.) This specifies that one of the two scale tests must occur between January 1 and June 30 of the calendar year and the second must occur between July 1 and December 31 of the calendar year. A minimum of 120 days is required between these two tests. More frequent testing is required for scales that do not maintain accuracy between tests. Cattle weighed on the ground will be weighed in full then sorted for any cuts and then the cuts will be weighed back. Cattle weighed on the truck will have cuts sorted off prior to loading.
- All cattle are sold FOB shipping point. Losses resulting from transit shall be buyer's liability. Freight rates are not guaranteed by CCV or seller.
- No freight adjustment will be given on cattle that weigh below the estimated base weight if merchantable head count is within 5% of contracted head count.
- All cattle will be sold on a sliding scale as described in each lot's information. Slide increases 2 cents if pay weight exceeds base weight 36# or more.
- If a lot has multiple options & buyer exercises the option to purchase all of stated lots, the contract becomes one lot.
- All percentages used to describe color are approximate and used for description only.
- **Cattle Country Video** will have a representative present at all shipments.
- Ship dates will be set at rep's option unless otherwise stated.
- Inspection & Warranties: Seller shall deliver within 5% of the above stated number of livestock, exclusive of any stags, cripples, blind, loosed, lump-jawed or otherwise unmerchantable livestock that are not as described above.
- Failure to Deliver: Upon the seller's failure to deliver to the buyer, the number of head stated in the contract (regardless of the reason, except an Act of God), the seller shall be liable for replacing any cattle not delivered with cattle of equal size and quality or pay the buyer the difference between the price stipulated in the livestock forward contract and the prevailing market price on the number of head not delivered, which shall be based on the average weight of those delivered and/or make the necessary freight adjustment to the buyer. The replacement of cattle, monetary adjustment and/or freight adjustment shall be at the seller's expense and the buyer's option and approval.

WARRANTIES:

- There are no warranties beyond what is expressly set forth in this contract. Seller & CCV representative, warrant that seller has good and marketable title to the livestock and that the livestock will be delivered free from all security interests, liens or encumbrances. If said cattle are subject to a lien, security interests or chattel mortgage, liens will be satisfied by seller at delivery.

PAYMENT:

- All purchases will require a \$100.00 per head part payment due and payable at the conclusion of the auction from buyers. Those buyers not present, using satellite, internet, or phone, to purchase livestock will be required to wire transfer funds the following business day. Seller will receive a down payment at conclusion of the auction.
- Part Payment: Upon the sale of the livestock CCV will advance the seller \$80.00 per head, as part payment, for the livestock described in this contract. In the event that seller fails to deliver the livestock as described in this contract, or if the cattle are rejected because they are not as described in this contract, or at the time of delivery there are any Federal or State regulations prohibiting interstate shipment of said livestock, seller shall return CCV all money advanced and this contract will become null and void. Seller acknowledges CCV will receive \$100.00 per head, as part payment, from the buyer. The \$20.00 per head received from buyer and not paid to seller will be held in CCV's Custodial Account for Shipper's Proceeds until the livestock deliver. **EXCEPTION:** No part payment will be paid on any cattle that deliver within 7 days after the conclusion of the auction.

PAYMENT (continued):

- Acceptable payment upon shipment of the cattle will be as follows: **(A)** If buyer is present at delivery, full payment in collected funds must be received at delivery. **(B)** If the buyer is not present at delivery, payment must be received by **Cattle Country Video within one business day** after the cattle are received by the buyer at delivery point. All payments must be made by either wire transfer or ACH transfer. All fees incurred for wire transfer will be at the buyer's expense. In the event of multiple day shipments, payment will be required on each day's delivery. All payments will be made to **Cattle Country Video** Custodial Account for Shipper's Proceeds.
- **Execution:** Should buyer or seller not be present or available to execute the herein contract on auction day, the making of part payment by buyer, or the receipt and negotiation of part payment by seller, shall constitute full agreement by buyer or seller to the terms and conditions set forth herein. Mailing, postage prepaid, of the herein agreement to buyer or seller at their last known address, shall serve as full notice to buyer and seller of the said terms and conditions. Failure of buyer or seller to object in writing, facsimile transmission or first class US mail, to the terms and conditions herein, within twenty-four (24) hours after receiving notice, shall constitute notice, shall constitute a waiver on the part of buyer or seller of lack of notice, or agreement, to all the terms and conditions herein.
- **Security Agreement:** In consideration of Cattle Country Video making direct payment to seller on behalf of buyer, buyer hereby grants to Cattle Country Video a security interest in the livestock described herein, including the products and proceeds thereof; until such time as final payment of the full purchase price of said livestock is made by wire transfer of funds. Default shall exist if final payment is not received within one business day from the date buyer takes possession of the livestock described herein or upon the death, bankruptcy, or insolvency of the buyer or upon the sale of said livestock without Cattle Country Video representative, prior written permission. Upon default, CCV representative with or without notice, may exercise any and all rights accorded by law.
- **Default:** In the event of failure on the part of either the buyer or seller (parties), regardless of reason – except an act of God, to perform under the terms of this agreement, the non-defaulting party may pursue any available remedy at law or equity including specific performance against the defaulting party. In addition, the successful party in any action brought to enforce this agreement shall be entitled to costs and reasonable attorney's fees as determined by the Court.
 - A.** In the event of default upon receipt of written notice clearly stating the default, Cattle Country Video shall deliver the balance of the down payment to the non-defaulting party or in the event of a dispute concerning the performance of either party, Cattle Country Video may deposit the down payment into an interest bearing account located at Pinnacle Bank, Torrington, WY and shall place both parties names on the account which shall require a signature from both parties to remove any of the money. Upon payment of the down payment as provided for in this paragraph, Cattle Country Video, its members, employees and representatives shall be released from any further liability and have no other obligations to either party. The parties understand and agree that Cattle Country Video does not guarantee to either party and is not a "party" to this agreement. The parties further understand and agree that all warranties either expressed or implied are between the parties.
 - B.** The parties both agree that after payment of the money as described in this provision, they release Cattle Country Video, its representatives, members and employees from all responsibility for any default by either party. In no event shall Cattle Country Video be liable for lost profits or any special, incidental consequential damages however arising.

BUYER & SELLER RESPONSIBILITY:

- **Seller** agrees that the remaining balance, less commission due to CCV representative, &/or any necessary adjustments, shall be paid at the time of the delivery.
- **Seller** shall be responsible for the expense of weighing and all fees subject to Federal and State regulations; such as health inspection, brand inspection, Beef Checkoff and any other statutory fee requirements.
- **Seller** shall furnish any brand and health certificates required by Federal and State law and all affidavits pertaining to the contract.
- **Buyer** is responsible for notifying CCV representative when health certificates are needed. If additional certificates are required for delivery to another state, they shall be provided at the buyer's expense.
- **Seller** shall handle livestock in their normal and usual manner until delivery, unless otherwise expressly agreed in writing.
- **Cattle Country Video** cannot guarantee the "First Born Date" need for "Back Verification" on age and source verified cattle.
- **Buyer** can obtain necessary calving information from the age and source provider prior to purchasing cattle. Cattle Country Video cannot guarantee the availability of information or data from age and source providers.
- **No Sale or Pass Out Fee & Filming Fee:** Seller will be charged a \$5.00 per head nonrefundable filming fee on Calves and Yearlings, and a \$25.00 per head fee for Bred Cattle and Cow/Calf Pairs. This fee will also be used as a Pass Out/No Sale fee. Consignor has the right to No Sale their consignment or consignments but must be declared by the conclusion of next consignment lot.
- **Scratch Fee:** If by certain circumstances an owner withdraws their livestock from an auction before the catalog is printed they will not be charged a scratch fee. If the consignment makes the catalog and the owner scratches said consignment then there will be a charge of \$5.00 per head on calves and yearlings and \$25.00 per head on bred cattle.

CCV RESPONSIBILITY:

- Cattle Country Video is a production company only and assumes no financial responsibility for cattle represented in our video sales.
- This contract contains the entire agreement between seller and buyer.
- Cattle Country Video and its representatives are not financially responsible for any loss or paying of freight due to Acts of God or War (Rain, sleet, lightning strikes, snow, hail, ice, wind, mud, floods, cyclones, earthquakes, tornados, and hurricanes). Also CCV and its representatives will not be financially responsible for any loss from closed roads, lateness, neglect or any other incident pertaining to buyers or truck drivers. Buyers are solely responsible for trucking!

SLIDES:

All cattle will be sold on a sliding scale with one of the slides described below.

Traditional Slide

If the average weight is over the original base weight the price will be adjusted by the amount stated in the contract for every pound over the base weight.

Example:

Base weight of 800#: Steer purchase price of \$150.00/cwt, with a slide of \$.08
Average pay weight of 830# on day of delivery
830# - 800# = 30# over base weight
30# X \$.08 = \$2.40/cwt off purchase price
\$150.00/cwt - \$2.40/cwt = \$147.60/cwt adjusted price

Weight Stop

A weight stop can be placed on a Lot of cattle which gives an option to the buyer to purchase extra weight but not have to pay for it (Or anything over 35 lbs is free).

Example:

Slide: \$.08
Weight Stop: 35#
Average pay weight is 840#; weight stop is at 835# so the last 5# is free
35# X \$.08 = \$2.80/cwt
\$150.00/cwt - \$2.80 = \$147.20/cwt adjusted price

Two-Way Slide

Slide off decreases price per CWT by stated slide amount starting at 1 lb over base weight, stopping at stated stop (35 lbs max). Slide on increases price per CWT by stated slide amount starting at 1 lb under base weight stopping @ stated stop (35 lbs max).

Example:

Over Base Weight

Weight stop at 35# over base weight
840# average pay weight - (same as above)
760# average pay weight

Under Base Weight

800# - 760# = 40# under base weight and price stop at 35# under base weight
35# X \$.08 = \$2.80/cwt = \$152.80/cwt adjusted price

BREEDING HEIFERS, BREEDING COWS & FEEDING HEIFERS:

- a. Guaranteed Open Heifers: heifers that will be pregnancy checked by a licensed veterinarian at seller's expense, within 14 days of delivery. At delivery, heifers will be accompanied by a certificate from a veterinarian verifying they are open. All tests (palpation, ultrasound or blood test) must be done by a licensed vet. Buyers will have the option to re-pregnancy check heifers within 48 hours after day of shipment at buyer's expense.
- b. Running to Be Open Heifers that are not known to be with a bull but could have been exposed. There is no guarantee by either the seller or CCV.
- c. All Bred Cows and Heifers must be verified by a licensed veterinarian through either Palpation or Ultrasound. Preg check must be done within 7 days of delivery at seller's expense. Seller will furnish a veterinarian's certificate at time of delivery. The buyer will have the right to have a veterinarian of his choice re-preg and mouth the cattle, at delivery, at his expense. Breeding and calving dates are required whether A.I. or natural service.
- d. The state of entry, health entry requirements are the responsibility of the buyer. The seller will supply the health certificate that is appropriate by the original state & federal law for interstate shipment. If there are any further health certificates or tests that are needed for the terminal state, it will be at the buyer's demand & expense.
- e. Each buyer (at buyer's expense) is given the right to administer a veterinarian of his/her choice at the delivery to pregnancy check and/or mouth any of their breeding stock. If the buyer does not use their right to administer his/her own veterinarian, he/she accepts the veterinarians certificate without recourse on Cattle Country Video and Independent Reps or of the seller.
- f. A variation of more than 5% may occur on head counts depending on the results of blood test, fertility test, age determination, and palpation.

Cattle Country Video

VACC PROGRAM

CCV²⁴

(Calves vaccinated at branding 2-4 months)
IBR-PI3-BVD-BRSV (Modified live)
Clostridial 7-Way (Black Leg)
Optional Parasite control

Will yield & grade on any grid.**Rep:** Torrington Michael Schmitt

(307) 532-1776

A black and white photograph capturing a serene moment in a rural setting. In the foreground, a man and a young girl stand amidst tall, dry grass. The man, positioned on the right, is seen from the side, wearing a light-colored t-shirt and dark jeans. He is looking towards a herd of cattle in the middle ground. The girl, standing slightly to his left, is wearing a light-colored sweater and patterned shorts, also looking towards the cattle. The herd consists of several dark-colored cows, some of which are facing the camera. The background is a vast, flat landscape with a few distant trees or shrubs under a bright, clear sky. The overall mood is peaceful and contemplative.

BALANCER[®] CATTLE MAKE THE GRADE

"We've been buying and finishing Balancer-sired calves every year since 2019 and they have made us money every year even with relatively high corn prices."

- KENT NELSON, ROOSEVELT, UT

BALANCER[®] Gelbvieh x Angus or Red Angus

Increase Performance

ADDING THE POUNDS

Steers in the AGA Scale and Rail Contest had an average daily gain of 4 lbs. per day in the feedyard.

MAKING THE GRADE

Carcass data collected from over 3,600 Balancer sired steers and heifers resulted in 88% USDA Prime and Choice with 91% yield grades 1, 2, or 3.

DELIVERING THE VALUE

Gelbvieh ranks #1 for percent retail product according to U.S. Meat Animal Research Center progress report #22.

Brief Summary of full Prescribing Information.

VALCOR™

(doramectin and levamisole injection)

(5 mg/mL doramectin, 150 mg/mL levamisole hydrochloride)

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

INDICATIONS:

VALCOR™ is indicated for the treatment and control of the following species of parasites in beef cattle two months of age and older and in replacement dairy heifers less than 20 months of age. Not for use in beef bulls intended for breeding over 1 year of age, dairy calves, and veal calves.

Gastrointestinal Roundworms (adults and fourth stage larvae): *Ostertagia ostertagi* (including inhibited larvae), *O. lyrata*, *Haemonchus placei*, *Trichostrongylus axei*, *T. colubriformis*, *T. longispicularis**, *Cooperia oncophora*, *C. pectinata**, *C. punctata*, *C. sumabada*, *Bunostomum phlebotomum**, *Strongylus papillosus**, *Oesophagostomum radiatum*, *Trichostrongylus axei**, *Nematodirus helvetianus**. **Lungworms** (adults and fourth stage larvae): *Dictyocaulus viviparus*. **Eyeworms** (adults): *Thelazia* spp. **Grubs** (parasitic stages): *Hypoderma bovis*, *H. lineatum*.

Sucking Lice: *Haematopinus eurysternus*, *Linognathus setulosus*, *Solenopotes capillatus*. **Mange Mites:** *Psoroptes bovis*, *Sarcoptes scabiei*. *Adults only

WARNINGS AND PRECAUTIONS:

WITHDRAWAL PERIODS AND RESIDUE WARNINGS:

Cattle must not be slaughtered for human consumption within 15 days following last treatment with this drug product. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; use in these cattle may cause drug residues in milk and/or in calves born to these cows or heifers. Not for use in beef calves less than 2 months of age, dairy calves, and veal calves. A withdrawal period has not been established for this product in pre-ruminating calves.

User Safety Warnings:

Not for human use. Keep out of reach of children. If accidental eye contact occurs, flush eyes immediately with water for 15 minutes and seek medical attention. If wearing contact lenses, flush eyes immediately with water before removing lenses then continue rinsing for at least 15 minutes. Do not eat, drink or smoke while handling the product. Wash hands after use. Take care to avoid accidental self-injection. If accidental injection occurs, seek medical attention and provide product package insert to medical professional. To obtain a Safety Data Sheet(s), contact Zoetis Inc. at 1-888-963-8471 or www.zoetis.com.

Animal Safety Warnings and Precautions:

Use of levamisole in cattle treated in the last few days with cholinesterase inhibitors such as organophosphates or with morantel may enhance the toxic effects of levamisole. Use together with caution.

Destruction of *Hypoderma* larvae (cattle grubs) at the period when these grubs are in vital areas may cause undesirable host-parasite reactions including the possibility of fatalities. Killing *H. lineatum* when it is in the tissue surrounding the gutlet may cause bloot killing *H. bovis* when it is in the vertebral canal may cause staggering or paralysis. These reactions are not specific to treatment with VALCOR™ and can occur with any successful treatment of grubs. Cattle should be treated either before or after these stages of grub development. Consult your veterinarian concerning the proper time for treatment. Follow recommended dosage carefully. Reproductive safety has not been evaluated in bulls intended for breeding.

ADVERSE REACTIONS:

This product is likely to cause swelling at the injection site. Tissue damage at the injection site may also occur, including possible granulomas and necrosis. These reactions have resolved without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter. A single death attributed to clostridial infection associated with the injection of VALCOR™ was reported in a non-pivotal effectiveness study. Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Hypersalivation may be observed; however, this reaction will disappear within a few hours. If this condition persists, a veterinarian should be consulted.

Contact Information:

Contact Zoetis Inc. at 1-888-963-8471 or www.zoetis.com. To report suspected adverse drug experiences, contact Zoetis Inc. at 1-888-963-8471. For additional information about reporting adverse drug experiences for animal drugs, contact FDA at 1-888-FDA-VETS or <http://www.fda.gov/reportanimalae>.

TARGET ANIMAL SAFETY:

Margin of Safety: Subcutaneous administration of VALCOR™ was well tolerated in calves as young as 3 months of age at 1, 2, or 3 times the recommended dose. Dose-dependent post-dose hypersalivation was seen in all treated groups compared to the controls. All cases of hypersalivation were mild, transient, and resolved without further medical intervention. Dose-related injection site reactions were observed, and those in the 1X group resolved between 21 and 28 days post injection. Injection site reactions were primarily swelling which resolved between 21 and 28 days post injection. Findings from the injection sites included swelling, edema, inflammation, muscle necrosis and fibrosis.

Female Reproductive Safety: The reproductive safety of VALCOR™ was established in two studies with female cattle. First, a single dose of VALCOR™ was administered subcutaneously at 3 times the recommended dose at times coinciding with folliculogenesis, implantation, or organogenesis, and had no effects on conception, calving, abortion, and stillbirth rates, and post-natal viability up to 30±2 days post-calving. There were no congenital abnormalities. The only test article-related change was an increase in incidence and duration of swelling at injection sites compared with control, but all swellings eventually resolved. In a second study, a single dose of VALCOR™ administered subcutaneously at 3 times the recommended dose at either early or late gestation had no effects on calving, abortion, and stillbirth rates, and post-natal viability up to 30±2 days post-calving. One control calf and two treated calves were born with congenital abnormalities and did not survive. These were not determined to be test article-related. The only test article-related change was an increase in incidence and duration of swelling at injection sites, but all swellings eventually resolved. Not for use in bulls intended for breeding over 1 year of age, as reproductive safety has not been evaluated.

HOW SUPPLIED:

VALCOR™ is available in 100 mL, 250 mL and 500 mL multi-dose, rubber-capped glass vials.

STORAGE, HANDLING, AND DISPOSAL:

Store below 25°C (77°F). Do not expose to light for extended periods of time. Do not contaminate water by direct application or by improper disposal of drug containers. Dispose of containers in an approved landfill or by incineration.

Approved by FDA under NADA # 141-553

TOUGH ON TOUGH WORMS, EASY ON CATTLE PRODUCERS.

You can achieve effective parasite control in one product, where before you may have needed two. Valcor (doramectin and levamisole injection) is the first prescription cattle dewormer with two active ingredients in one dose. It's never been easier to be tough. Get tough at ValcorTough.com.

VALCOR®
(doramectin and levamisole injection)

IMPORTANT SAFETY INFORMATION: Do not treat cattle with Valcor within 15 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; not for use in beef calves less than 2 months of age, dairy calves, and veal calves. Safety has not been evaluated in breeding bulls. Use with caution in cattle treated with cholinesterase inhibitors. This product is likely to cause injection site swelling; tissue damage (including granulomas and necrosis) may occur. These reactions have resolved without treatment. See brief summary of Prescribing Information attached.
